RIJKSUNIVERSITEIT GRONINGEN

Adhesive mixtures for powder inhalation

The effect of carrier (surface and bulk) properties, carrier
payload and mixing conditions on the performance of
adhesive mixtures for inhalation

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. F. Zwarts,
in het openbaar te verdedigen op
vrijdag 30 juni 2006
om 14.45 uur

door

Bastiaan Hendrikus Jozef Dickhoff
geboren op 23 oktober 1974
te Katwijk

GUIDE

The research of this thesis was sponsored by and is the result of a co-operation with
DMV International, in Veghel, The Netherlands

Printed by Stichting Drukkerij C. Regenboog, Groningen, The Netherlands

'Truth is born into this world only with pangs and tribulations, and every fresh truth is received unwillingly. To expect the world to receive a new truth, or even an old truth, without challenging it, is to look for one of those miracles which do not occur.'

From: 'Alfred Russel Wallace' (an interview/obituary by W.B. Northrop), 1913, *The Outlook* (New York) 105: 618-622, on page 622.

Table of contents

Chapter 1	7
General introduction	
Chapter 2	37
The effect of budesonide particle mass on drug particle detachment from carrier crystals in adhesive mixtures during inhalation	
Chapter 3	47
The effect of carrier surface and bulk properties on drug particle detachment from crystalline lactose carrier particles during inhalation, as function of carrier payload and mixing time	
Chapter 4	69
The interaction between carrier rugosity and carrier payload, and its effect on drug particle redispersion from adhesive mixtures during inhalation	
Chapter 5	87
The effect of carrier rugosity on drug particle detachment during inhalation, in relation to carrier size and mixing intensity at low carrier payloads	
Chapter 6	107
The effect of carrier surface treatment on drug particle detachment from Crystalline carriers in adhesive mixtures for inhalation	
Chapter 7	127
Summary with major conclusions and some future perspectives	
Appendix 1	135
Samenvatting voor leken	
Appendix 2	141
List of publications and patents	
Appendix 3	143
Dankwoord	
Appendix 4	145
Curriculum Vitae
